Daitem Security System

Technology Center 2600

Applicant believes that on or about January 11, 2000, Daitem sold a security system with the following characteristics. Daitem has a web site at <http://www.daitem.com> and a place of business at:

Rue du pre de l'orme  
38926 Crolles cedex France

1. The system has ring detect. Users can program the system, so that they can call in from a phone and change the status of the system.
2. If there is an alarm condition, the control panel sends an RF packet over to the phone module.
3. When there is a tamper condition, the phone module sends an RF packet over to the control panel, an alarm goes off at the control panel, and the phone module begins to call out.
4. When an antenna is cut, the phone module sends an RF packet over to the control panel, an alarm goes off at the control panel, and the phone module begins to call out.
5. The control panel sends out a supervisory message every 15 minutes.
6. The DWS normally open makes a comparison to a resistance of 1524 ohms.
7. When the "emergenza" (emergency) button on the phone module is pressed, it will call out.
8. If a caller attempts to call in to the house with the phone module when the alarm goes off, the phone module will cut off the caller immediately and begin calling the first emergency number in memory.
9. The messages from DWS, PIRs, etc, must go through the control panel before they mean anything to the phone module.
10. If an alarm is set off, the phone module has begun calling out, and the phone line begins to ring, then the disarm sequence will immediately end the phone call.
11. The system transmits around 315 MHz.
